Product Details

Testfire 2000 Series is the worlds first multi-stimulus detector tester for smoke, heat and CO fire detectors. Smoke, Heat and CO stimuli are created in a single test unit, and delivered individually, or – for the first time – simultaneously; in whichever combination is required.

Testfire does this without using pressurised cans of gas or other hazardous goods. Stimuli (Smoke, Heat and CO) are generated at the time of test using safe and patented processes fuelled by replaceable capsules.

Key Features

- Testing with one tool is faster and more productive
- Less tools and equipment to carry around
- Combined stimuli, delivers quicker activation times for combination detectors
- Unique Clearing Cycle provides rapid detector reset with no repeat alarms
- Test times reduced by as much as 66% saving labour
- Fully reverse compatible with the Solo range of poles, battery batons and chargers.
- Ideal in any application, Land, Air and Marine
- A must have addition to any Professional Engineers Tool Suite
- Reduced carriage and shipping costs – no pressurised cans of gas
- Reduced Test Stimuli Re-stocking and freight costs – no pressurised cans of gas
